|--------------------|---|
| Location:          | Laketon Township<br>Muskegon County, MI       |
| Construction Date: | 2015  |
| Project Cost:      | \$ 328,000                                    |
| Client:            | Laketon Township                              |
| Contact:           | Ms. Kim Arter<br>Supervisor<br>(231) 744-2454 |

The sidewalk consists of approximately 6,850 lineal feet (1.3 miles) of concrete sidewalk varying in width from 5 to 6 feet. The sidewalk is located in a residential area and is funded by the Federal Highway Administration's Safe Routes 2 School Program, an international movement to make it safe, convenient, and fun for children to bicycle and walk to school. The terminus of the sidewalk project is at Reeths Puffer Elementary School. The project was

contracted by Laketon Township and designed using the 2012 Michigan Department of Transportation Standard Specifications. The sidewalk was also designed in accordance with the AASHTO Guide for the Planning, Design, and Operation of Pedestrian Facilities and current Americans with Disabilities Act requirements.

J&A handled all aspects of construction engineering to include: topographic mapping, development of easement descriptions, construction staking of the concrete sidewalk, documentation of all construction related quantities, coordination with the material testing subconsultant, resolution of citizen complaints, utility coordination with the various utilities encountered during construction, attending a preconstruction meeting, documentation of project record quantities, and development of contract punch lists.
